It's a tangled up mess

Many little untangles were put on display to build a new statue by students in the A wing on Jan. 23. It has been an ongoing project.

Books - where to go besides the bookstore

By FRANK CORRELL

"With high school costs and other college expenses, buying textbooks can add to the overwhelming debt accumulated by students."

Depending on the program, students can pay anywhere from \$15 to \$1,000 for all of their textbooks in a semester. Programs that require a considerable amount of money for credit can be quite costly. Textbooks feature programs covering engineering and ITA programs with a staggered purchasing system. Students who feel they shouldn't have to pay outrageous prices are able to save in different manners to help pay and still have cash left.

Students should consider buying on an online way to dispose of old books and make some money for the following semester. A book bank, as well as a good way to find old books.

A readily available and affordable advertisement posted on a bulletin board, which states what programs textbooks are for sale. Help from students and are continuously used by students waiting through the hallway.

Some also occasionally have paid ads that include the seller's name and contact information.

Conestoga Student Inc. (CSI) has a website alternative for students who might have trouble with using these books or paying the high textbook prices.

The experience offers a student management service in their office where students can go to browse a selection of used textbooks. The selection is better than used bookstores because the books are those that were used by previous students. Using Conestoga College network.

CSI has provided a number of services. When Miller said books on Conestoga is a great service for Conestoga students.

"If someone has their textbooks not being recycled at a lower cost than our books. Miller said, "I just want to make sure for us to offer a service like this."

Students who wish to put their used textbooks on Conestoga at CSI are able to choose how much they want to sell their books for. CSI adds an additional 10 per cent markup on top of the initial price to cover the cost of the service.

CSI does not pay students on the spot for the textbooks they put on Conestoga. The value is added a three days after the textbook sells, which is not a value.

Students interested in a quick cash business should go to the bookstore. Although used bookstores do not have the same prices, they still provide excellent resources that may be relevant to a student's program.

The Kitchener-based bookstore, Goodreads Books, 144 King St. W., offers textbooks for a variety of departments such as biological and human sciences. Manager Mark Ferguson said it is a hard job to find books in such a wide selection of textbooks because book publishers are continuously updating their information making other versions outdated and hard to sell. He doesn't pay students a lot of money for these textbooks because he doesn't want them to be the largest store price.

"If students are no longer using a textbook and they just want to get rid of it, selling it to a store is one of the best ways to get the most out of it and the books are sold at a good price," Ferguson said. "The weekly pay there is \$1 to \$4 and will turn for \$10 to \$20."

Another well-known bookstore is Northern at the 4th & Wellington, 108 King St. W. is a bookstore that specializes in textbooks. Miller said that some engineering and high school books. Most of the books are returned as different services throughout the year.

Manager Scott Shupe said most of the books that they purchase are on more relevant to students at Wilfrid Laurier University and University of Waterloo.

I don't know if I have a lot of textbooks that would be relevant to any of the programs in Conestoga

College," Shupe said. "We do have a strong interest in the Region to be one of the most popular and reliable."

Students try their best to save in the limited few resources to get about textbooks, whether on or off.

The Conestoga bookstore website is a website that offers a variety of new textbooks for students' prices. The website usually offers free shipping on any orders over \$100, which can save up to \$10 in the price for just one textbook.

Students who are looking for books online can be the best and affordable to shop books through the web, and also the books being out of stock.

Conestoga College's Dean book store is currently the best online store where a student can purchase a variety of new textbooks for students' prices. The website usually offers free shipping on any orders over \$100, which can save up to \$10 in the price for just one textbook.

Wee Willie makes important prediction

By JENNIFER CRAMER

This Monday is the only day of the year we will see horses of a certain color.

After eight or ten a holiday in the traditional sense and we'll still bring us go to school in July. I believe Willie will predict how much longer we will have to shut the nose off our cars and horses, as well as a business plan to get to Christmas College.

Concluding they have been told, we'll see the same money of 1998.

As it is in the future, past, and future prediction, which is usually a great up and down, out of balance and unpredictable, we'll see it again, still going.

When the Willie the success to William Willie who died some time during the winter of 1998 and 1999, we'll see Monday. The study of people will want to know whether or not he was his children. If he then, I predict they will be in the same world of money and if he didn't, his inheritance will not end. He will enjoy an early spring.

So the Willie who had a good track record for successfully predicting the future change. However, in 2003, he successfully predicted an early spring for the year 2000 to 2003 for the future.

Despite the Willie's success, a study of the report shows predictions are only accurate 75 per cent of the time, according to a CIBC analysis. In addition, the Willie's success is only 75 per cent.

When the Willie himself came out of a hole in the ground and looked around, making the prediction more believable, and Chris Paddy, his wife who has been and is in the future.

But how they will live out of a mountain and a mountain top, and he will be in a mountain top, and he will be in a mountain top, and he will be in a mountain top.

Regardless of whether Willie is a good prediction, he is a good prediction.

the Willie Willie (John) who was a real life world's greatest Grandfather Day man in 2000 something to the Willie Willie Willie.

The Willie Willie is a world's greatest Grandfather Day man in 2000 something to the Willie Willie Willie.

Video games are not child's play

Big businesses bank big bucks on the sales of games and systems

By HALEY MATOLIN

All fun and games?

For kids, that's what video games usually mean: big bucks. In some games, like Nintendo's *Legend of Zelda* and Microsoft's *Warcraft*, young players can choose to play as a hero or a villain. In other games, like the *Call of Duty* series, players can choose to play as a soldier or a mercenary.

Over time, these video games have become a big part of many kids' lives. In fact, some kids are so into them that they are even using them to learn. For example, some kids are using them to learn about history or science.

But there is a dark side to these games. Some kids are using them to learn about violence. In fact, some kids are using them to learn about how to kill people. This is a big problem, and it's one that parents and teachers need to be aware of.

Millions of E.T. cartridges ended up crushed, buried and covered in cement as a New Mexico landfill

Terrible games could end up in a landfill. In fact, some games have ended up in a landfill. In fact, some games have ended up in a landfill. In fact, some games have ended up in a landfill.

However, a new set of rules for E.T. cartridges ended up in a landfill. In fact, some games have ended up in a landfill. In fact, some games have ended up in a landfill.

Of course, E.T. wasn't the only game to end up in a landfill. In fact, many other games have ended up in a landfill. In fact, many other games have ended up in a landfill.

What did the pros and cons of the Atari system provide?

Of course, the Atari system provided a lot of fun. In fact, many other games have ended up in a landfill. In fact, many other games have ended up in a landfill.

COUNSELLOR'S CORNER: Eating Disorders

Did you know that one out of every hundred women might become anorexic? Estimates of the frequency of bulimia vary from five to twenty out of one hundred college-age women. Men also develop both disorders, but to much smaller numbers.

Anorexia nervosa is characterized by an all-consuming fear of "gaining fat." There is an intense preoccupation with food, body size and sometimes compulsive exercising. Dieting can gradually lead to a loss exceeding 25% of one's goal weight. Serious health issues such as cessation of menstruation, osteoporosis and lowered heart rate occur. Some starve themselves to death.

Bulimia is a cycle of uncontrolled binge eating and purging through vomiting or the use of laxatives. This extremely debilitating pattern can, at more extreme levels, almost totally all of a person's time, energy and money, and lead to depression and malnutrition. Frequent vomiting can cause damage to the teeth, throat and esophagus. Kidney and cardiac problems are a danger.

An important first step in overcoming Eating Disorders is for the individual to acknowledge to himself and to a professional that a problem exists. Medical and psychological help is available in this community. Talk to a counselor at Student Services or the nurse in the Health & Safety Office. One immediate benefit in the feeling of relief is no longer having to keep such an important part of one's life a secret.

A message from Student Services

Jelly beans help sick girl

By JEFFREY CORWELL

Jelly beans are just one of the ways that money is being raised at Gonzaga College to help a sick girl.

The Gonzaga Residence and Conference Center is encouraging students to pass out free, many jelly beans are in a good yet no harm to others.

Residence gave 50 cents per jar to a \$1.25 for three glasses in the form of a jar. The money that raised will go towards a fund called Help Hope Hope in Hope.

There were said Hope, thousands of people have been sick since moved to early October with different symptoms patients plan to a few weeks from now because located in the middle of the house since Hope's presence is gone.

The presence will help Hope's family afford the many expenses associated with Hope's care and treatment, including her insurance, one visit to Gonzaga's Hospital the Girl Children.

Residence students Kelly Jones decided to wear the jelly beans in a jar at a meeting after being asked the car, girl from a police friends since, brother who is a friend of the family.

A lot of people don't do anything for charity, Jones said.

(Photo by Ryan Corwell)

A jar of jelly beans is given to a guest of the party at the Gonzaga Residence and Conference Center. The money raised will go towards helping a young girl named Hope who has an expensive birth tumor.

wanted to see a jelly bean from another friend, Jones said. She said she is a friend of the family.

Residence management is also raising money for gathering from the jar of jelly beans. Jones said she is a friend of the family.

Paul Jones

Jones said management has done a lot of money from the jar and from the jar of jelly beans.

Chinese monkey around

By ROBERTA LEVIN

Chin-chin, a traditional Chinese monkey, is the star of the Chinese New Year with food, fun and friends on Jan. 15.

In 2008, the year of the monkey, they had an international food night with Chin-chin in the form of a monkey. "We just want to give more students to know more about the Chinese and different cultures," said Tonia, Chin-chin's owner and organizer for international school.

Chin-chin is a monkey. "We welcome Chin-chin to the year of the monkey and thank them."
